Promoting positivity, wellness and balance in life through qi gong

Qi Gong (or Chi Kung) is the ancient Chinese art of energy cultivation which has become popular throughout the world for its many health-giving benefits. It consists of static and flowing movements which are co-ordinated with the breath to circulate and direct qi around the meridians (energy pathways) of the body. Just some of the many benefits of regular practice include relaxation, boosting the immune system, strengthening the body and a sense of well-being.
